Product designer
New products, AI & design systems

Experience

Sitecore

Product designer ∘ Aug 2024 - Present

Joined as the dedicated AI designer. Role has since grown to cover product design for SitecoreAI, set product vision for new initiatives, build and maintain the design system, and enable cross-functional AI workflows.

Key initiatives

Blok design system

- Led the rebuild of Sitecore's design system onto a more governable tech stack: built components, onboarded a front-end team, set the roadmap and oversaw GTM.
- Drove adoption through townhalls, community-of-practice sessions and external advocacy.
- Blok is now integrated into Sitecore's automated development lifecycle and used externally by Sitecore partners.
- **+50 components built, 100% marketplace application adoption, all products road-mapped to use Blok**

Agentic Studio

- Designed how agentic workflows appear in SitecoreAI, including chat, in-line object editing and guided creation.
- Prototyped directly in product code repositories and published branches for customer validation and discovery sessions.

SitecoreAI DAM

- Took the initiative from no scope or vision to a defined product direction: user personas, jobs to be done and stakeholder interviews.
- Designed the future-state experience, which aligned scoping and unlocked months of work. Dedicated product and development teams were formed to build it.

AI Innovation Lab

- Worked directly with Sitecore's VP of AI and Innovation to test the company's AI vision with customers and partners through interactive prototypes.
- Fast-paced, hands-on programme sponsored by Microsoft where we got early access to new AI capabilities.

A few CMS initiatives...

Conversion optimisation, site localization and audience-based site personalization

Education

Leadership, Innovation & Technology (Part-time) - TU Dublin
Master of Science (MSc) ∘ Aug 2026 - Present

Interaction Design - NCAD, Dublin
Bachelor of Arts (BA) ∘ Aug 2020 - Jun 2024

AI Applications - CCT, Dublin
Postgraduate Higher Diploma (H.Dip) ∘ Jun 2022 - Apr 2023

CPD

Sitecore Top100 Programme
Personal mentoring by Sitecore executives

Building my own applications
Built, released, and generated revenue from a couple of products

Skills *(What others say I'm best at)*

Product road-mapping

B2B Saas domain knowledge

Prototyping

Artificial intelligence (AI)

User journeys

Communication & presentation skills - Can present coherent stories to large audiences

Wireframing

Design engineering

Tooling *(Most used)*

Figma Claude Code Cursor Confluence

Dovetail Miro Jira
